M-Enabling Summit 2019

New accessible technologies are rapidly transforming the way users interact with digital interfaces. The **M-Enabling Summit** has established itself as the leading global conference covering fast-moving technological innovations that enable seniors and persons with disabilities to access digital content and services and interact with their environment in new ways. The **M-Enabling Summit** is the ideal venue to support independent living in an interconnected world for seniors and persons with disabilities. With its 2019 theme "Accessibility: Transforming Users' Experience" the Summit offers a platform for companies to promote their accessible products, services and assistive technologies and to network with accessibility professionals and organizations seeking to address compliance challenges and market development opportunities.

Attendees of the **M-Enabling Summit** are decision-makers looking to leverage technological advances in accessibility as an essential differentiator in gaining a competitive advantage. The **M-Enabling Summit** program is specifically designed to give participants tools, knowledge, and networking opportunities they can implement into their everyday lives in the rapidly expanding market of assistive and accessible technologies.

In addition, the International Association of Accessibility Professionals (IAAP) will host its annual conference within the Summit, focusing on technical and organizational training tracks.

The 8th edition of the **M-Enabling Summit Global Conference and Showcase** will be held on June 17-19, 2019 at the Renaissance Arlington Capital View Hotel, in Washington, D.C.

Learn, network, and improve the lives of seniors and people with disabilities.

Featured Topics Include:

- Artificial Intelligence (AI) for end user interfaces
- Augmented Reality
- Critical Accessibility Gaps
- Accessible Security, Identification and Privacy Protection
- Implementing Accessibility within your organization

- Autonomous Mobility
